

Geographic Codes for HMDA/CRA Editing and Verification

The 1996 file consists of 64,462 observations of four items each:

MSA code
State code
County code
Tract number/BNB

covering the 50 states, DC, and Puerto Rico.

- The MSA code will equal 9999 if the state/county/tract-BNB falls outside of a Metropolitan Statistical Area.

- The Tract/BNB number will equal 999999 if the state/county is classified as small (population $\leq 30,000$) or untraced (all or part of the county is not traced). These small or untraced counties will also include the Census Tract or BNB numbers. ALL areas in the United States, DC and Puerto Rico are assigned a census Tract or BNB number.

- Refer to the HMDA or CRA edits to understand the logic of verifying Geographic code combinations. The edit logic for HMDA and CRA slightly. (The edits may be obtained by calling the HMDA Assistance line at (202) 452-2016 or the CRA Assistance Line at (202) 872-7584. You may also request a copy via electronic mail at hmdahelp@frb.gov or crahelp@frb.gov.)

Notes:

In New England, if a tract is split between 2 or more MSAs, or between 1 or more MSAs and no MSA, the state/county/tract on this file will appear for each MSA and Non-MSA area.

Since the 1990 Census was conducted, a new county was formed in Alaska (068, Denali). This county is included on the file.

Alaska no longer has county 231; it was split and two new counties (232 and 282) were formed.

For HMDA purposes, if a county is partially untraced, the entire county is considered untraced.

For HMDA Purposes, it is ***acceptable*** for a HMDA reporter to code census tracts or BNAs in small or untraced counties as "NA" on the HMDA-LAR form.

For CRA Purposes, it is ***unacceptable*** for a CRA reporter to code census tracts or BNAs in small or untraced counties as "NA". The appropriate Census Tract or BNB number must be reported.
